

Scope of Supply

The shop must have ADSL or Fiber Optic supplied by any Internet Service Provider (Telekom, Vodafone, Ono, Orange, etc.)

Inside the box it is shown our scope of supply:

- A router which allows opening and closing Internet sessions and controlling the bandwidth.
- A wireless access point (WAP).
- System design, engineering and programming included.

In case of finding thick walls or reinforced doors or the place is too big, WAP repeaters are added. (not shown in the figure)
